

TEST PLAN

EduPlan AI Study Planner

Abstract

This document defines the manual testing strategy, scope, objectives, testing environment, deliverables, and testing approach for the EduPlan AI Study Planner web application. It serves as the guiding document for validating the application's functionality and quality before release.

Test Plan

Project Information

Project Name: EduPlan AI Study Planner

Application Type: Web Application

Version: v1.0

Tester: Alishba Rashid

Testing Type: Manual Testing

Test Environment: Google Chrome on Windows 11

1. Introduction

EduPlan AI Study Planner is a web application designed to help students organize their study schedules, manage academic tasks, monitor progress, and track upcoming deadlines.

This test plan outlines the testing strategy, scope, objectives, test environment, deliverables, and testing activities required to validate the functionality and quality of the application through manual testing.

2. Objective

The objective of this testing effort is to verify the functionality, usability, and reliability of the EduPlan AI Study Planner web application through manual testing. The testing aims to validate the application's core features, identify defects, document issues in Jira, and support the delivery of a stable and reliable application.

3. Scope of Testing

The following modules were included in testing:

- User Registration
- User Login
- Demo Login
- Dashboard
- Task Management
- Calendar
- Progress Analytics
- Upcoming Deadlines
- User Logout

4. Testing Types Performed

The following testing techniques were used during the testing process:

- Functional Testing
- User Interface (UI) Testing
- Negative Testing
- Exploratory Testing
- Regression Testing

5. Test Environment

Application: EduPlan AI Study Planner

Application Type: Web Application

Development Platform: Bolt.new

Source Code Repository: GitHub

Browser: Google Chrome

Operating System: Windows 11

Bug Tracking Tool: Jira

6. Entry Criteria

Testing was initiated after the following conditions were met:

- The application was successfully deployed.
- The web application was accessible.
- Core application features were available for testing.
- The testing environment was properly configured.

7. Exit Criteria

Testing was considered complete after:

- All planned test cases were executed.
- Identified defects were reported in Jira.
- Reported defects were fixed and verified.
- Regression testing was successfully completed.
- QA documentation was finalized.

8. Test Deliverables

The following QA deliverables were produced during this project:

- Test Cases
- Test Execution Report
- Defect Log
- Jira Bug Reports
- Regression Test Execution Report
- QA Test Summary Report

9. Tools Used

The following tools were used throughout the testing process:

- Jira
- GitHub
- Google Sheets
- Microsoft Excel
- Bolt.new
- Google Chrome

10. Conclusion

This test plan provided a structured approach for performing manual testing on the EduPlan AI Study Planner. The application was evaluated through functional, UI, negative, exploratory, and regression testing. All identified defects were documented, verified after fixes, and the application successfully completed regression testing, demonstrating readiness for release.
